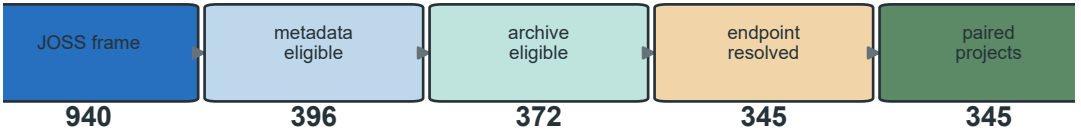
a

Frozen frame to version-paired extraction cohort



Unresolved states remain in the ledgers: 7 metadata-stage, 4 archive-stage and 27 endpoint-stage records.

b

Immutable pair

2 snapshots per resolved project

c

Reusable record families

- **7 core CSV tables**
  project, snapshot, structure, dependency, API, delta, validation
- **Evidence links**
  relative source members and row-level comparison status
- **Static boundary**
  no install, import or execution of candidate code

Scope is a bounded JOSS/Python census; selection and parser missingness are data, not quality or prevalence estimates.
